ABOUT CINDY

In the blink of an eye, my entire life was changed. August 2008, I was diagnosed with stage 3 breast cancer. Being a wife of an active duty Soldier and raising three beautiful daughters, life went from being simple to uncertain. After successfully completing chemotherapy, double mastectomy, and radiation, my passion is to help others. I am a follower of God and a daughter, sister, wife, and mother and now I can proudly say a SURVIVOR!

WHAT IS BREAST CANCER?

Breast cancer is a disease in which malignant (cancer) cells form in the tissues of the breast. It is considered a heterogeneous disease—differing by individual, age group, and even the kinds of cells within the tumors themselves. Obviously no woman wants to receive this diagnosis, but hearing the words “breast cancer” doesn’t always mean an end. It can be the beginning of learning how to fight, getting the facts, and finding hope.
